	4	27										(NONE) As above, colors all too garish; smaller more age appropriate to town. (NONE) Need to find better options. (J) Signs should not be blocked by vegetation. (NONE) To what destinations? We need to build something before we make signs to it. (NONE) Variety - colonial style (K) But concerned about longevity - always see these faded and worn out. (K) Important for longevity and easy to read font size - old images if they add is nice bonus; prefer K because bigger image size
